

I am writing in response to the threat of taking away a radio station in my town; air1, based out of California. I am very encouraged by this station and I believe it to be an encouragement to many. This station definately plays more positive music than any other station on the airwaves. I believe it to be safe music for people of all ages, especially children. There is no need for parents to fear their children listening to this station, which isn't able to be said about most other stations aired ANYWHERE, much less just here in my town. Thank you for your time.
